

## Hyaluronic Acid Body Lotion

With the visible "lifting effect"

Light body lotion with the visible "lifting effect". Provides intensive moisture care to keep skin hydrated. Hyaluronic acid is a natural, bioactive moisturizer that has the ability, to bind large amounts of water. The skin is lifted, making it noticeably smoother, firmer and tighter. With regular use, deep lines are visibly reduced while new wrinkle formation is diminished. Almond oil, wheat germ oil and jojoba oil complement the skincare effect ideally, leaving your skin wonderfully soft, smooth and supple. Pleasant, delicate fragrance.
