

## Biotin tablets for horses

Nutritional supplement for horses  
For hooves, skin and hair

### Good to know:

Biotin, also known as vitamin H, helps to maintain the callus, skin and hair structure. It promotes cell growth and the maturity of keratin cells and thus prevents fragile, brittle hooves and sand cracks that can be caused by a biotin deficiency. A biotin deficiency can also be indicated by flaky, dull hair and, in rare cases, through hair loss. Tierlieb biotin tablets for horses can counteract these feed-related deficiencies.

- Supports hoof growth and hoof strength.
- Promotes the elasticity of the hooves
- Maintains the resistance of the skin
- For a normal hair metabolism
- ADMR-compliant

Simple and accurate to dose. Sufficient for 50 days for a horse with a body weight of 600 kg.
