

## Moringa Oil

100% pure, cold pressed, for skin care

Moringa oil is cold pressed and filtered from the seeds of the moringa tree (*Moringa oleifera*). It is characterised by its very high unsaturated fatty acid content. Its high oxidation stability makes it highly durable without preservatives or other additives and stops it going rancid. Moringa oil is popular as a care product for the skin, lips or around the eyes, or as a beneficial massage oil.

**Ingredients:** Moringa Oleifera Seed Oil.

Quality feature: At temperatures below 20 °C, moringa oil becomes milky and flocculates due to the long-chain fatty acids forming layers. In such cases, warm it up again slowly, e. g. in a water bath at approx. 35 °C.

Please keep tightly closed, in a dark place and below 25°C.
