

German Wild Honey

A spicy-aromatic, dark honey from the forests of Baden-Württemberg and Bavaria. On the sunny day of late summer, bees collect honeydew from coniferous and deciduous trees; it is a sweet plant sap, which they turn into this unique honey speciality. The gentle harvest and processing method guarantees full and pure honey enjoyment, whereby the taste variety and originality of the honey is largely retained.

Origin: Germany

Made in Germany

Contents 500 g

Art. No. 592
