

tierlieb BARF Feed Oil

Dietary nutritional supplement for dogs

Some fatty acids are essential for dogs, and cannot be formed as part of their natural metabolic processes. Animal fats from fish and plant-based oils form the basis for a healthy fat metabolism, which is able to provide sufficient energy in all phases of life. Tierlieb BARF Feed Oil supplies important, unsaturated fatty acids and improves the ratio of Omega-3 to Omega-6 fatty acids in a diet containing high levels of meat. A balanced supply with the unsaturated Omega-3 fatty acids α -linolenic acid, EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid) has a positive effect on the immune system and on dog joints. The Omega-6 fatty acid linoleic acid is also a component of every body cell, and ensures healthy skin and beautiful fur.

- Full nutrient content through gentle cold pressing
- Supports the joint metabolism in case of osteoarthritis (arthrosis)
- Contains vitamin E as a natural protection against oxidation
- Suitable for biological raw feed appropriate to the species (BARF)
- With measuring cup

Composition: 42 % Safflower Oil, 32 % Linseed Oil, 26 % Fish Oil.

Nutritional additive (per kg): Vitamin E 2,680 mg

Analytical contents: Fat content 100 %

Metabolisable energy: 35.5 MJ/kg (850 kcal/100 g)

Minimum content essential fatty acids:	
Omega-3	
α -linolenic acid	16,4 %
EPA (eicosapentaenoic acid)	4,2 %
DHA (docosahexaenoic acid)	3,0 %
Omega-6	
Linoleic acid	36,3 %
Unsaturated fatty acids at least	76,6 %

Feed recommendation: Mix 5 ml tierlieb BARF Feed Oil per 10 kg of body weight each day into the feed. Growing dogs and pregnant/lactating dogs should receive two to three times this amount (observe the size of the litter and the age of young dogs).

In order to ensure optimum supply with vital mineral substances, trace elements and vitamins when providing raw feed, we recommend feeding the tierlieb BARF Additive.

In order to provide support for joint problems and osteoarthritis, administer tierlieb BARF Feed Oil for up to 3 months and then consult a vet if applicable prior to further use or extension of the feeding duration.

Keep dry and out of direct sunlight. Store below 25°C.
