

## Self-tanning Body Lotion

Healthy, tanned skin without UV light

Magically create a summer-fresh, natural-looking tan on your skin with this light, especially easy application self-tanning lotion! At the same time, your skin is moisturised and beneficially protected against dryness. Erythrulose, a gentle, highly compatible tanning substance on a sugar and DHA base provides an even, streak-free, healthy tan over your entire body. Absorbs quickly, does not get greasy and has a delicate and pleasant fragrance.

### Application:

Carefully and evenly apply to the desired body sections. Can be used daily as a nourishing full-body lotion. After a few days, the skin will be fresh and evenly tanned.
