

## tierlieb Black Cumin Mix

Feed for horses

Ready-to-feed black cumin mix from cold pressing

### Useful information:

This 100% pure black cumin mix is produced from the gentle, first cold press of genuine black cumin (*Nigella sativa*). It contains a reduced oil content (approx. 10 %) with polyunsaturated fatty acids. Black cumin is also characterised by its high natural content of valuable vital substances and essential oils. The press cake is rich in fibre and promotes natural digestion.

**Analytical contents:** crude protein 33 %, crude fat 15 %, crude ash 6 %, crude fibre 7 %.

### Feeding recommendation:

Mix up to a hand full (50-100 grams), depending on the size of the horse, into the normal food each day.

Do not feed to pregnant animals. Black cumin should only be fed after consultation with the veterinarian if the liver is impaired or if the animal is on medication.

Keep dry and out of direct sunlight. Store below 25 °C.
