

Vitamin D3-1,000 I.U. Drops

Nutritional supplement

Useful information:

Vitamin D is essential for many vital functions. Vitamin D3, the active form of the vitamin in the body, plays amongst other things an important role in achieving solid, sturdy bones and teeth, a strong immune system and healthy muscle functions. The body can produce vitamin D itself through the sun's rays, which is why it is also referred to as the "sun vitamin". In particular adolescents and the elderly can suffer a vitamin D deficiency, generally in the winter months, but also due to our modern lifestyles, which is why a nutritional supplement is recommended. For many users, vitamin D3 drops are a particularly simple and pleasant method of taking the vitamin. They can be easily dosed from the practical pipette bottle.

Each drop contains 25 µg vitamin D3, which is equivalent to 1,000 I.U.

Ingredients: bulking agent MCT Oil (Medium-Chain Triglycerides), Vitamin D3, antioxidant alpha-Tocopherol.

	per drop (=daily dose)	% of NRV recommended daily dose*	per 100 g drops
Vitamin D3	25 µg	500	103 mg

*NRV = Nutrient Reference Value for daily consumption according to Regulation (EU) No. 1169/2011

Recommended dose: take 1 drop per day.

Keep dry and out of direct sunlight. Store below 25°C.

Nutritional supplements should not be used as a replacement for a balanced, varied diet, and do not replace a healthy lifestyle. Keep out of reach of young children. Do not exceed the recommended daily dose.
