

Manuka Balm

For dry, sensitive skin.

This intensive, rich balm with real manuka honey (flower nectar of the South Sea myrtle) provides the skin on the face, body and hands with moisture and unique nutrients for a healthy, smooth complexion and a pleasantly relaxed feeling. Manuka honey is known for its strong antibacterial effect, which can have a soothing and beneficial effect on dry, sensitive and irritated skin in particular. Natural beeswax, royal jelly, coenzyme Q10, hyaluronic acid and precious plant oils support the care ideally and give a natural, healthy radiance.

Avoid contact with eyes.
