

## Apricot Kernel Oil

Natural, cold pressed body oil

Apricot kernel oil is extracted from the inner kernel from the stone of select, ripe apricots through a purely mechanical pressing process. This brings out the subtle hint of bitter almond particularly well. Apricot kernel oil strengthens the skin's barrier function, supports its moisture-absorbing capabilities and protects it from drying out. It is, therefore, particularly suitable for caring for dry, irritated and aging skin, as well as baby care. Fragrance-free.  
In cooler temperatures, turbidity or flocculation may occur, which does not impair the quality.

**Ingredients:** Prunus Armeniaca Kernel Oil.

**Contents 100 ml**

Art. No. 656
