

Coconut Oil Facial Cream

Moisturising cream for intensive care with real organic coconut oil

Our sensitive facial skin is directly exposed to environmental influences such as the cold, heat, wind and weather. Therefore, it profits from targeted care. Coconut oil is considered a 'secret tip' ingredient: it is quickly absorbed into the skin, dispenses important protecting and nutrient substances, has a revitalizing effect and moisturises and cares for the skin, leaving it velvety soft and supple. An additional effective complex made from sugar beet and corn starch improves the moisture content in the skin and supports its natural moisturising factors. Valuable care components such as jojoba oil, cocoa butter and shea butter perfectly round off this care product. Pleasantly delicate coconut fragrance.
