

Age Spots Cream

against pigment and age spots

Keeps skin looking vibrant and well-maintained. Specially developed to avoid and minimize existing pigment and age spots. Jojoba oil, macadamia nut oil, vitamin C, E, and a physiological moisturizer nourish the skin, leaving it smooth and supple and protect it against harmful environmental influences. A special combination of active ingredients with SPF 15 protects the skin from harmful UV rays, acts against the formation of new pigment spots and reduces the melanin content of the skin. With regular use, can be detected after four weeks, a clearly visible skin lightening and a more even skin tone. After four weeks of regular use it creates a visible skin lightening and a more even skin tone. UV-filters dermatologically tested.
