

Aloe Vera Sun Protection Milk SPF 30

- Protects against UVA- and UVB-rays
- Provides moisture and care
- Natural aloe vera gel 49 %

Provides high protection against sunburn and early skin aging. Contains a high Sun Protection Factor and natural aloe vera gel (49 %). Protects against UVA- and UVB-rays and familiarizes the skin slowly to the summer sun. Aloe Vera Sun Protection Milk can be easily spread on the skin and is quickly absorbed. High-dosed aloe vera makes the skin soft and smooth, leaves a velvety feeling and is also ideal for the body exposed to the sun. At the same time moisture loss is balanced and thus counteracts premature skin aging specifically.

Ingredients: Aloe Barbadensis Leaf Juice, Ethylhexyl Methoxycinnamate, Propylheptyl Caprylate, Caprylic/Capric Triglyceride, Cetearyl Alcohol, Diethylamino Hydroxybenzoyl Hexyl Benzoate, Pentylene Glycol, Zinc Oxide (nano), Cetearth-12, Tocopheryl Acetate, Allantoin, Glycine Soja Oil, Sodium Cetearyl Sulfate, Xanthan Gum, Sodium Benzoate, Citric Acid, Potassium Sorbate, BHT, Triethoxycaprylylsilane, Parfum.

Application: apply generously before sunbathing. Applying small amounts reduces the protection level. Avoid the strong midday sun. Repeat application regularly to maintain sun protection, especially after swimming. Protect babies and toddlers against direct sunlight and use protective clothing as well as sun cream with a high protection factor (SPF higher than 25). Even sun creams with high sun protection factors do not offer full protection against UV rays, therefore do not remain in the sun for too long. Avoid contact with the eyes and textiles - permanent stains are possible.
