

## Joint Friend Dog Capsules

Vitaminised supplementary animal feed with glucosamine,  
chondroitin mineral nutrients and proteins for dogs.

### Good to know:

Vitaminised supplementary animal feed with calcium, magnesium, eight important B-vitamins as well as the valuable mucopolysaccharides glucosamine and chondroitin for dogs. These are components of the connective and supportive tissue, such as skin and cartilages and of mucous secretions that have gliding and protective effects. Due to the balanced proportion of vitamins and minerals, the bone structure is strengthened and connective tissue and cartilage keep its elasticity and smoothness.

### Analytic components:

Crude protein	42 %	crude fiber	0.1 %
crude fat	< 0.1 %	calcium	5.8 %
crude ash	29 %	magnesium	3.6 %

**Ingredients:** Gelatin (27.5 %), glucosamine from shellfish (24.5 %), chondroitin sulfate (14.4 %), calcium carbonate, magnesium carbonate, magnesium stearate.

### Nutritional physiological additives/kg:
