

## Stevia Tablets

Table sweetener based on steviol glycosides (rebaudioside A) from stevia and sorbitol

Stevia (*Stevia rebaudiana* Bertoni), also called sweet herb or honey herb, is a plant originating from Paraguay. Stevia owes its astounding sweetness, which far exceeds that of common sugar, to the stevioglycosides found in the leaves.

Stevia Tablets are almost free of calories and do not affect blood sugar levels, making them suitable for persons with diabetes. Stevia Tablets can be used diversely as a sugar substitute and are also perfect away from home thanks to the refillable, practical dispenser.

**Ingredients:** Sorbitol Sweetener, Monosodium Citrate (acidifier), Sodium Hydrogen Carbonate, Steviolglycoside Sweetener from stevia (12.9 %), Silicon Dioxide and Magnesium Stearate (separating agents).

For food, limited use, with sweeteners.

Sorbitol can have a laxative effect when used excessively (quantities from 10 g per day, corresponding with approx. 280 tablets).

**Dosage:** 1 stevia tablet is equivalent to about 3 g sugar or 1 sugar cube.

Store in a cool, dry place.

Made in Germany

**Contents 600 tablets = 40 g**

Art. No. 454
