

Green Oat Tea

Green Oat Tea is derived from the green, over-ground parts of the cereal oat plant, which are harvested and quickly dried shortly before full bloom.

Ideal for drinking programmes for the increased flushing of the urinary organs and kidneys.

Preparation: Pour ½ liter of boiling water over 3 tablespoons of Green Oat Tea. Allow to cool to room temperature and strain. Only that way you get a safe food.

Application: Drink ½ liter a day for 4-5 weeks.

Ingredients: 100 % oat herb.

Close properly and store in a dry place.
