

Natural Medicinal Plant Juice Purple Coneflower Echinacea

Pressed purple coneflower juice
100ml/100ml

The body's own defences are mobilised when taking purple coneflower juice, which generally results in increased resistance in the whole organism. This fights a variety of germs and damaging foreign particles. Echinacea effectively reinforces the body's tissues so that protection against the penetration of bacteria is improved. This is used as biological immunity and therefore gives a preventative effect against infections.

Substance group / indication group mode of action

Herbal medicinal product for cold symptoms.

Fields of application: Natural Medicinal Purple Coneflower Plant Juice is produced from a plant related to the sunflower. The ancient Indians in America, who discovered the healing power of this medicinal plant, only used the purple coneflower (lat: Echinacea) when fresh as long as the ingredients were fully maintained and pure.

Areas of application

Supportive treatment for frequently returning (recurrent) infections in the airways and urinary tract.

Contraindications

When should Natural Medicinal Purple Coneflower Plant Juice not be used?

It should not be used in case of over-sensitivity against the ingredients or composite plants. Due to general considerations, Natural Medicinal Purple Coneflower Plant Juice should not be taken in case of progressing system illnesses such as tuberculosis, leukaemia or leukaemia-type illnesses, inflammatory illnesses in the connective tissue (collegenosis), multiple sclerosis, AIDS infections, chronic viral illnesses and other autoimmune illnesses.

Precautions for application and warning advice

When used for airways infections: Please consult a doctor in case of ongoing complaints, breathing difficulties, fever or phlegm containing pus or blood.

When used for urinary tract infections:

Consult a doctor if there is blood in the urine, a fever, or symptoms that last longer than 5 days.

Sufficient research has not yet been conducted concerning the effect of this medicinal product during pregnancy and breastfeeding and on children under 4 years. It should therefore not be used during pregnancy and breastfeeding or on children under 4 years.

Interactions with other remedies:

There are no known interactions.

Dosage instructions, type and duration of application:
