

Orthopaedic Mattress Topper

Comfortable sleeping position enables relaxing sleep!

The orthopaedic mattress topper made of viscoelastic memory foam is characterized by its ideal adaptability to the body contour. By pressure and body heat the topper softens in the area of shoulder, hips and knees and lowers exactly at these points. Further outwards the material maintains its orthopaedic supporting character. Thus the spine stays straight and enables a noticeable more comfortable lying without any unpleasant feeling of pressure. Moreover, the viscoelastic memory foam is breathable and suitable for allergy sufferer.

Measurements: approx. 100 x 200 x 7 cm

Art.-Nr.: 509
