

Organic Barley Grass Powder

Purely plant-based, vegan
Extra quality

Useful information:

Barley grass is the name of the young, green barley plant (*Hordeum vulgare*), which subsequently produces cereal grains. Barley grass has a similar nutrient composition to green leaf vegetable, but the density of the nutrients is much higher. This is surely the reason why barley grass has a long tradition as a valuable source of nutrients in many cultures. Our Organic Barley Grass Powder is gained from the very gently dried, young leaves of the barley plant, which is grown in line with controlled organic guidelines.

Organic Barley Grass Powder can simply be stirred into water, juices or food to enjoy.

Ingredients: 100 % Organic Barley Gras Powder from controlled organic cultivation.

Recommended use:

Dissolve 1 teaspoon of Organic Barley Grass Powder in approx. 200 ml water or stir into food 2 - 3 times per day.
