

## Vitamin-B-Complex for dogs and cats

Nutritional supplement with B-vitamins, biotin and choline

### Useful information:

Sufficient amounts of B-vitamins are essential for the metabolism and vitality because they are important for the nerves, mucous membranes and the skin. Tierlieb Vitamin-B-Complex Capsules contain a balanced combination of all B-vitamins to support the nerves of stressed dogs and cats and to prevent a lack of Vitamin B. In case of a vitamin B deficiency they tend to eat faeces and constantly scratch their skin. Especially young and breed animals need higher levels of B-vitamins. Biotin contributes towards a healthy skin and a shiny coat. Choline supports the lipometabolism and liver function.

### Analytical contents:

Crude protein 0.8 %, crude fat 1.2 %, crude ash 21.8 %, crude fibre 0.3 %.

**Composition:** Corn starch, magnesium carbonate, gelatin, magnesium stearate.
