

tierlieb Virgin Coconut Oil

Feed for horses, dogs and cats

Useful information:

This top-class coconut oil is gained through purely mechanical pressing of the fruit of ripe coconuts from controlled organic cultivation. Above all the high lauric acid content makes this oil so valuable. Oils primarily serve to supply energy, and promote the absorption of liposoluble vitamins. However, lauric acid also has an effect on various insects and ticks. The virgin, high-quality Tierlieb Coconut Oil can be administered externally and internally to care for paws, skin and fur.

- High natural lauric acid content (approx. 50 %)
- Suitable for biological raw feed appropriate to the species (BARF)
- Supplies easily available energy
- For healthy skin and a beautiful coat

Composition: 100 % natural coconut oil (cold pressed and untreated).

Analytical contents: Fat content 99.8 %, protein 0.2 %. Metabolisable energy: 35.5 MJ/kg (845 kcal/100 g).

Feed recommendation / day:

Mix the recommended quantity into the feed (1 level teaspoon equals approx. 5 g).

Cats: 1 g

Dogs: 1 g per 5 kg body weight

Horses: 10-30 g (1-3 tablespoons) in case of increased performance requirements or to improve the taste of feed.

For external application, rub some coconut oil into the palm of your hand and massage it evenly into the coat or paws.

Coconut oil becomes liquid at temperatures over 25 °C.
