

Pomegranate Face Cream

Precious nourishing care cream with pomegranate, that has a regenerating effect on the skin. The pomegranate has in many cultures been regarded as a symbol of vitality, beauty and youth. Most of all, the precious seed oil moisturizes the skin and gives it a youthful freshness. Dry, cracked skin becomes smooth, supple and radiantly beautiful again. Pomegranate seed oil is rich in unsaturated fatty acids and bioactive ingredients, that help protect from damaging environmental influences and have a positive effect on the regeneration of skin cells. With regular use, Pomegranate Face Cream prevents the formation of pigmented lesions and other premature signs of aging. It is easily absorbed and non-greasy. Pleasant, delicate scent.
