

Moisturising ampoules

High quality active ampoules with wheatgerm extract, moisture controlling sphingoceramides, aloe-vera and a natural moisturise retention complex. The ingredients retain moisture, increase elasticity, strengthen the skin and make it soft, smooth and supple.

Ingredients: Aqua, Pentylene Glycol, Glycerin, Aloe Barbadensis Leaf Juice, Sodium Lactate, Sodium PCA, Aloe Barbadensis Leaf Extract, Triticum Vulgare Germ Extract, Triticum Vulgare Bran Extract, Panthenol, Allantoin, Ceramide NP, Phytosphingosine, Ceramide AP, Sodium Lauroyl Lactylate, Lactic Acid, Urea, Niacinamide, Inositol, Xanthan Gum, Propanediol, Glycine, Ethylhexylglycerin, Cholesterol, Pantolactone, Potassium Sorbate, Phenoxyethanol, Dehydroacetic Acid, Ceramide EOP, Benzoic Acid, Carbomer, Sodium Benzoate, Citric Acid, Fructose.

Sanct Bernhard stands for high-quality natural ingredients that gently care for the skin and gives it everything it needs for natural harmony and beauty.

Our skin changes over the course of time: the natural cell activity reduces, flakes of dead skin on the surface are not shed as quickly and the production of sebum reduces. The consequences are that moisture can no longer be stored as well. The skin becomes drier, tired, less supple and displays fine lines. The skin now needs specific and intensive nourishment to combat skin aging. The effectiveness of this care product is based on a combination of herbal and innovative active substances. These support the natural cell activity and fight the signs of skin ageing.

Sanct Bernhard moisturising ampoules are suitable for all skin types but have been specially developed for dry skin. They balance out the oil and moisture levels and make the skin soft and supple. They protect the skin, reduce redness and irritation; especially after sunbathing.

Caring for your skin becomes a perfect experience with Sanct Bernhard. Exact quantities and hygienic packaging ensure excellent quality. The ampoules can be sealed again, meaning the valuable active ingredients can be used sparingly and dosed accurately.

Wheatgerm extract contains multi-active nutrients and active agents that have a positive effect on the microcirculation and the moisture level of the skin. Mature and dry skin becomes again elastic, soft and smooth and fine wrinkles are gently smoothed.

Sphingoceramides are components of the hydro-lipid layer (moisture factor) and support the barrier function of the skin. This makes sure that the skin's own moisture is not lost and the skin remains elastic.

Aloe Vera gives the skin moisture, reduces swelling and protects. Irritated skin, especially after sunbathing or sunburned skin, is soothed and given new moisture.

A special **moisture complex** increases the skin's moisture potential.

To achieve perfect skin care, you carry out a course of cosmetic nourishing treatments with 14 individual treatments. This corresponds with the contents of one box of ampoules. Repeat this course of treatment at regular intervals. We recommend our pack of 3 for a 6 week application for intensive treatment.

Application: The contents of an ampoule are perfect for two generous intensive applications per day - one in the morning and one in the evening. Cleanse the skin thoroughly then apply the moisturising concentrate onto a cotton wool ball, apply evenly to problem zones and gently massage in. Then apply your facial care cream as usual.

Contents 14 ampoules à 2 ml pour l'application externe
