

Self-tanning Cream

Healthy, tanned skin without UV light

Tanned skin suggests youth, success and holidays! And this even though everyone knows that nothing accelerates the aging process for skin more than UV light.

Our Self-tanning Cream helps you attain a healthy tan without the negative side effects of sun exposure. The even tanning effect is based on a natural substance on a sugar base that tans the skin slowly and evenly. The full tan develops after 2-4 days. Integrated into a nourishing and moisturising cream base, and containing vitamin E and ceramides, the Self-tanning Cream can be used daily like a face or body cream.

Ingredients: Aqua, Cetearyl Alcohol, Propylene Glycol, Erythulose, Pentylene Glycol, Tocopheryl Acetate, Saccharide Isomerate, Dimethicone, Cetheareth-12, Sodium Cetearyl Sulfate, Glycine Soja Oil, Sodium Citrate, Citric Acid, Phospholipids, Sphingolipids, Parfum, p-Anisic Acid, Tocopherol.
