

Ubiquinol 50 mg Q10 Bioactive Mono Capsules

Nutritional supplement

Good to know:

Before the body can use the coenzyme Q10, it has to be transformed into ubiquinol, the bioactive form of the coenzyme. If the body is supplied directly with ubiquinol, the conversion process becomes redundant. Ubiquinol, the activated Q10, is immediately available for the organism.

Each capsule contains 50 mg Ubiquinol (Kaneka QH™ the active form of CoQ10).

Ingredients:

Soybean Oil, Gelatin, humectant Glycerine, Ubiquinol (8 %), thickening agent Silicon Dioxide, emulsifier Sunflower Lecithin, colorant Iron Oxide.

	per capsule	per daily dose (=2 capsules)
Ubiquinol	50 mg	100 mg

No Nutrient reference value for the daily intake according to VO (EU) No. 1169/2011 has yet been established

Recommended dosage:

Take 1-2 capsules per day (preferably in the morning), unchewed with sufficient liquid.

Keep out of direct sunlight. Store dry and not below 25°C.

Nutritional supplements should not be used as a substitute for a varied and balanced diet and do not replace a healthy lifestyle. Keep out of the reach of young children. The recommended daily dose should not be exceeded.
