

## Orthopaedic Side Sleeping Pillow and Child's Pillow

For restful sleep without the feeling of tension and pressure. Perfect for children from 2 years of age. Also very suitable as a side sleeping pillow, travel pillow and for people who prefer to sleep with the head in a low position.

Parents or grandparents who want to treat their children or grandchildren can give them this orthopaedic pillow as a gift. With its core made of viscose-elastic foam, protected by a cotton inner cover, the pillow moulds itself fully to the shape of head and shoulders. This gives the neck optimum support, which reduces strain on the spine for relaxation and noticeably relieves the muscles. The excellent heat and moisture regulating properties ensure a pleasant sleeping environment. The outer cover with the practical catch fastener can be removed and washed at 30°C. No zip, therefore cosy and comfy and without the risk of injury.

Note: A pillow should be avoided in baby's bed in the first few weeks and months of life, because babies can accidentally pull the pillow over their heads and have difficulty breathing.

**Dimensions:** approx. 30 x 50 x 5 cm
