Devil's Claw Granules 100 %

Feed for dogs and horses
Supports the musculoskeletal system and the digestion

Useful information:

The product's name originates from the African devil's claw (*Harpagophytum procumbens*) due to the striking appearance of its fruits. Its well-known powers, which are particularly valued amongst dog- and horse-owners, are however contained in the roots of the plant. The main constituents are harpagoside, which is a bitter substance, flavonoids, phytosterols and cinnamic acid. This nutrient complex supports the metabolism of joints, tendons and muscles and maintains the animal's mobility and well-being. In addition, the bitter substances contained promote the distribution of digestive juices and therefore the digestive functions.

Feed recommendation per day:

Large horses (600 kg LG) 24 g (approx. 4 tablespoons), smaller breeds and ponies 18 g (approx. 3 tablespoons). Dogs (per 10 kg) 1 - 2 g (approx. ½ teaspoon). Add to feed.

Composition: 100 % devils' claw root (*Harpagophytum procumbens*).

Analytical contents: Crude protein 3.8 %, crude fat 0.6 %, crude ash 19.2 %, crude fibre 10.1 %.

Notes:

In accordance with the anti-doping and medication control rules laid down by the Deutschen Reiterlichen Vereinigung (FN - German Riding Association), a withdrawal period (from the last use of the product until use at the show) of 96 hours is recommended for horses. Do not feed to puppies or pregnant bitches.

Keep dry and out of direct sunlight. Store below 25°C.
