

Sanct Bernhard
Premium Gold! Night Care

Pure luxury for a radiantly beautiful appearance!

Sanct Bernhard Premium Gold! gives your skin top-class care with innovative, extremely valuable ingredients.

Our skin is particularly active whilst we sleep. Cell divisions take place at an increased rate; repair work is conducted. Sanct Bernhard Premium Gold! Night care supports the nightly regeneration mechanisms through a combination of select, natural care and growth substances such as shea butter, macadamia nut oil and rose hip oil with bilberry leaf extract and plumping, skin-smoothing hyaluronic acid. The silk protein sericin regulates the natural moisture balance of the skin and gives it a delicate, smooth, supple feel. Finest 24-carat gold powder reflects the light, giving skin a magical shimmer. The immediate effect: Your skin is given intense care and supplied with moisture. Fine lines and wrinkles are softened and skin function sustainably stimulated. Your skin looks taut, smooth and vibrant again.

Pamper yourself with this unique care cream - for a perfect appearance full of beauty and radiance!

Application: Apply in the evenings after cleansing to the face, neck and décolleté and gently massage in.
