

Basil Extract - Hair Treatment

For thicker, fuller hair
Prevents hair loss

Hair treatment for the care of thin, dry and brittle hair and to combat hormonal hair loss not due to illness. With a special basil extract, Aloe Vera, caffeine, zinc, Panthenol, and rosemary oil. As is the case with several other herbs, basil surprises with the versatility of the nutrients and active ingredients contained therein. RootBioTec™, a special basil extract, has proven effective in the care for thin, dry and brittle hair and to combat hormonal hair loss not due to illness. When applied regularly, the papillary cells involved in hair growth are stimulated and the hair becomes thicker and fuller. Caffeine activates the hair root, prolongs the growth phase and improves hair growth. Zinc is an important growth factor for healthy roots.

Application: We recommend the daily application (3 pipette tips) in dry hair or after the wash. Apply the basil extract with the eyedropper directly onto the scalp and gently massage it in. Do not rinse.

Ingredients: Aqua, Sorbitan Oleate Decylglucoside Crosspolymer, Propylene Glycol, Aloe Barbadensis Leaf Juice Powder, Rosmarinus Officinalis Leaf Oil (Limonene, Linalool – from natural essential oil), Ocimum Basilicum Hairy Root Culture Extract, Panthenol, Zinc PCA, Caffeine, Urtica Dioica Leaf Extract, Betula Alba Leaf Extract, Arctium Lappa Root Extract, Chamomilla Recutita Flower Extract, Betula Alba Leaf Extract, Equisetum Arvense Extract, Arnica Montana Flower Extract, Salvia Officinalis Leaf Extract, Fructose, Glucose, Alcohol, Sodium Chloride, Hexylene Glycol, Urea, Dextrin, Sucrose, Citric Acid, Aspartic Acid, Glutamic Acid, Alanine, Phenoxyethanol, Benzoic Acid, Dehydroacetic Acid.
