

Anti Redness Cream

special care of skin with rosacea or couperose

The mild cream gel cares and strengthens thin, sensitive facial skin, that tends to be red and often the vessels particularly around the nose and on the cheeks turn into a reddish/blue colour. A harmonic combination of *Cardiospermum halicacabum* and echium oil together with kukui nut oil strengthens the skin barrier function, calms irritated skin and makes it more resistant against external aggression. Another active substance complex rounds off the care. The light cream gel leaves a comfortable, pleasant skin feeling and is perfume-free.
