Immune Complex Dog Tablets

Supplementary feed with colostrum, turmeric, cistus and zinc

Useful information:
Strong defences are important for a long and healthy dog life. A deficiency in nutrients, such as the trace element zinc, can impair the immune system, so care must be taken to ensure an adequate supply, especially in case of increased requirements. Tierlieb Immune Complex Dog Tablets provide organic zinc chelate, which is optimally absorbed and utilised by the body.
Colostrum is the nutrient-rich first milk, which is very important for young dogs. It contains biologically active molecules, such as antibodies (immunoglobulins). The plant-based ingredients of rockrose (*Cistus incanus*) and turmeric (*Curcuma longa*) are rich in natural plant substances such as polyphenols and curcumin, which support the body and vitality in a natural way.

- Optimally bio-available zinc
- Supports the maintenance of a normal. healthy immune system
