

Daffodil Sun Protection Cream SPF 15

Protection from UVA and UVB rays
Natural anti-aging care
With valuable narcissus extract

Daffodil Sun Protection Cream SPF 15 offers medium sun protection and natural anti-aging care for the face and whole body. The balance of UVA and UVB filters protects the skin against sunburn and damaging UV rays. Narcissus extract slows down the skin's metabolic process, which ages slower and can regenerate itself easier. Together with the moisturisers, carrot oil is the ideal regenerating care after sunbathing.

Ingredients: Aqua, Cetearyl Alcohol, Ethylhexyl Methoxycinnamate, Diethylamino Hydroxybenzoyl Hexyl Benzoate, Propylene Glycol, Pentylene Glycol, Saccharide Isomerate, Squalane, Sodium Cetearyl Sulfate, Cetareth-12, Narcissus Tazetta Bulb Extract, Daucus Carota Sativa Root Extract, Glycerin, Beta-Carotene, Glycine Soja Oil, Lactis Lipida, Ceramide NP, Phytosphingosine, Tocopheryl Acetate, Citric Acid, Disodium Phosphate, Lactic Acid, Chlorhexidine Digluconate, BHT, Tocopherol, Sodium Citrate, Parfum.

Application: apply generously before sunbathing. Applying small amounts reduces the protection level. Avoid the strong midday sun. Repeat application regularly to maintain sun protection, especially after swimming. Protect babies and toddlers against direct sunlight and use protective clothing as well as sun cream with a high protection factor (SPF higher than 25). Even sun creams with high sun protection factors do not offer full protection against UV rays, therefore do not remain in the sun for too long.

Avoid contact with the eyes and textiles - permanent stains are possible.
