

UC-II Capsules Natural collagen II

Food supplement with vitamin C and natural collagen II

Useful information: Collagen is the most abundant protein in the human body. As a so-called structural protein, collagen is found everywhere where elasticity and strength are important, i.e. in the skin, ligaments and tendons, cartilage, bones etc. UC-II® is the patented name for undenatured, natural type II collagen, which is responsible for tensile strength and toughness, especially in cartilage. UC-II® collagen can unfold its supportive function especially in case of stress on the joints caused by sports. The collagen content in the body also decreases with advancing age because production slows down. Supplementary vitamin C contributes to normal collagen formation, which is beneficial for healthy, normal cartilage function.

Ingredients: Vitamin C, bulking agent Microcrystalline Cellulose, Gelatine, Collagen (UC-II®, 8 %), stabiliser Potassium Chloride, separating agent Magnesium Stearate.

	per capsule (= daily dose)	% of NRV recommended daily dose*
UC-II®	40 mg	**
of which collagen	10 mg	**
Vitamin C	240 mg	300

*NRV = Nutrient Reference Value for daily consumption according to Regulation (EU) No. 1169/2011

** no reference value available yet

Recommended dose: swallow 1 capsule per day with sufficient liquid.

Keep dry and out of direct sunlight. Store below 25°C. Nutritional supplements should not be used as a replacement for a balanced, varied diet, and do not replace a healthy lifestyle. Keep out of reach of young children. Do not exceed the recommended daily dose.
